LEAN!!!	B C A	I LOVE LEAN!!!

FINDING BUTTONS

Your buttons will be known as a, b, and c.
Use the following steps to get your button numbers.
Modulo 16 (add or subtract 16 until within the range of 0-15) and remove decimals after each step. (i.e. 52.4 is 4). Add one to your final numbers.
Your numbers correspond to reading order buttons, top-left is 1.

A = First digit of SN	**A = Number of modules**	**A = Last digit of SN**
then...		
A and E are capital.		**a = a - 5**
L and N are capital and A is lowercase.		**b = b / 3**
L is capital and E is capital.		**c = a + b**
L and E are lowercase and A is capital.		**b = b * 2**
L and N are lowercase and A is capital.		**c = c / 2**
E is capital and A is lowercase.		**b = a + c**
L and E are capital, A and N are lowercase.		**a = b + c**
L, E, and A are capital.		**c = b * a**
A is capital.		**a = a + 7**
L and A are capital and E is lowercase.		**c = c - 3**
L is capital and E is lowercase.		**c = c + 5**
N is capital and A is lowercase.		**a = a / 4**
L, E, A, and N are lowercase.		**a = 5**
L, E, A, and N are lowercase.		**b = 5**
E, A, and N are lowercase and L is capital.		**c = 5**
Two or more numbers are equal.		**a = a + 2** **b = b + 1** **(repeat until false)**
